

Specification

3D VR Glasses
Crystal Clear
RIEM3 Plus

Bigger screen, no vertigo feeling
360 degree panorama

RIEM3 Plus is a new developed Virtual Reality(VR) headset. Using it, you could completely immerse in 3D virtual reality world.

Lens were designed by professional optical Doctor Team. Comparing with the existing lens in the market, Riem 3 plus would cause no any vertigo feeling even after using it for a long time.

Feature

- ◆ Lens designed by Optical Doctor team of RITECH, with clear imaging and no any vertigo.
- ◆ Professional structure design suitable to the people with hyperopia or myopia glasses
- ◆ FOV is up to 72 degrees, reducing the coefficient of imaging distortion and light leaking.
- ◆ Weight only 290G, 30% lighter than the products from other brands.
- ◆ Unique suspension head-belt design and super light weight distribute the headset weight to the strongest bone at forehead and greatly decrease the pressure to cheeks and other sensitive parts of head.
- ◆ Unique capacitive touch button, compatible with all Google Cardboard 2 games.
- ◆ Transparent AR window, no need to remove the cover.
- ◆ Peripheral sockets are designed for most usage of AUX port, data cable or charger.
- ◆ Available for smartphones with IOS and Android system and size from 4.7" to 6".

Silicon Instruction

After the installation of the head belt, please place the silicone gasket based on size of your phone. For details, please refer to the manual of Riem 3 Plus.

Packing Info

Without Pallets	
20"GP	6600pcs
40"GP	13320pcs
40"HC	13560pcs
With Pallets	
Unit QTY/ Pallet	360pcs
20"GP	4200pcs
40"GP	9180pcs
40"HC	11640pcs

Phone Range

RIEM 3 Plus is designed for screen size from 4.7` to 6`, for maximum of length and width as 157 mm and 84 mm respectively.

Ways get resources

- For 3D movies or videos, search "side by side 3D" in YouTube or other video websites on your phone, and play it in full screen to watch.
- For Apps, search the keywords such as "VR" or "cardboard" in Google play store or App store of IOS. And please make sure the ones you download should be the side by side format.
- Copy 3D side by side videos from computer or cloud storage to your phone, and use a video player in the phone to play locally.
- Copy 3D side by side videos into an USB storage device and connect it to your phone via an OTG data line. Open the video player on your phone to play 3D videos from the USB device. (The phone must support OTG function.)

ABOUT CAPACITIVE TOUCH BUTTON

The Capacitive Touch Button can simulate the touch of human's finger to the screen and it is fully compatible with all games and videos on Google Cardboard 2.

Warning:

Cleaning: Please use soft cloth to clean front lid and lenses when they are dirty. If it is hard to make it clean, please only use Neutral detergent to clean them and make sure to use clean water to completely remove detergent after.

Placing: After using, please do not have any hard objects rub the front lid and lenses. Also, please **NEVER** put RIEM3 Plus directly under the sunlight. As lenses of RIEM3 PLUS are convex, direct sunlight through convex lenses might generate high power or fire to hurt people.
